

TRY AAMCO

AAMCO
ALL AMERICAN METAL CORP

EASY INSTALLATION

AAMCO metal partitions are pre-drilled at the factory for ease of installation. This feature helps reduce the installation time and eliminates the potential of accidental scratching or marring by construction work crews. Doors are manufactured with pre-formed and reinforced inserts for easy hinge assembly as well as an internal concealed latch assembly. Pre-packaged door and bracket hardware kits simplify the installation process along with detailed factory produced shop drawings.

304 STAINLESS STEEL

AAMCO utilizes only Type 304 stainless steel material. Other manufacturers clearly advertise the use of Type 300 stainless and supply this lower grade of stainless steel that will rust.

HINGE PINS

AAMCO only supplies solid stainless steel hinge pins for all doors, as compared to plastic pins supplied by some competitors.

PAINT

AAMCO has the most modern electrostatic powder-coating paint system in the industry; providing a superior finish every time.

COMPETITIVE PRICING

AAMCO is extremely competitive in stainless steel and powder coated metal pricing.

WELDED CORNERS

AAMCO welds all corners on doors and panels rather than using "corner clips". Welding seals out moisture and provides greater vandal resistance as compared to corner clips.

DOUBLE FACED HONEYCOMB

AAMCO uses "double faced" honeycomb core filler on all fabricated steel components. This feature allows for maximum adhesion of core to steel, and provides superior sound deadening qualities. (As compared to others using "expanded" honeycomb core with no faces).

ELECTRO-GALVANIZED STEEL

AAMCO uses a commercial quality electro-galvanized steel containing a zinc coating thickness of 0.00015". This extra coating provides greater corrosion resistance and allows for a smoother powered coated finish, as compared to our competitors.

QUICK QUOTE RESPONSE

AAMCO responds to quote requests in less than 24 hours.

QUICK SHIPPING

AAMCO can ship Stainless Steel, Powder Coated Metal, and Solid Plastic in 24-48 hours.

CUSTOMIZATION

AAMCO can provide custom colors and configurations when required.

PRIVACY

AAMCO manufactures a wide variety of no sight-line partitions with customized hardware for its series of partitions from 58" to 72" heights.

FREE CONSULTATION

AAMCO can provide free consultation for any job, providing drawings and architectural submission.

ONLINE PARTITION DESIGNER

AAMCO has an online partition designer that provides real-time quotes as well as a drafting tool, at no charge to all the estimators of your team.

ARCHITECTURAL

AAMCO is an approved Architectural manufacturer of Division 10 toilet partitions.

ENGINEERED PRIVACY OPTIONS

Our new Premier Privacy line features taller doors and panels (58" to 72"). Sight lines are completely eliminated using AAMCO's newly developed privacy strips, continuous brackets, channels, and piano hinges. These new products can be provided on any of our bathroom partition styles.

PRIVACY STRIPS:

Available in three materials: aluminum, stainless steel, or powder coated steel, to provide a clean, sleek look for any installation. Our extruded aluminum strips are offered with either a standard anodized coating or painted to match your order. Stainless steel privacy strips are available with a standard #304 finish or in any of our textured finishes. Powder coated privacy strips are available in our galvanized steel or textured galvanized steel.

CONTINUOUS HARDWARE:

We offer full length brackets or channels and hinges for the installation of our partitions. Available in painted steel, stainless steel and aluminum, we are able to accommodate any designer's preferences.
